DIARY NOTES

25X1C

DD/S

29, 30, 31 August 1966  
1, 2 September 1966

2. Renovation of Admiral Raborn's Office: Our plan for renovating the office was first approved, then deferred, and reapproved last week. Renovation began on 10 September and should considerably improve that office.

3. Car and Chauffeur for Future DDCI: I asked for a report as to which car and what chauffeur should be assigned to the future DDCI. The Buick is the logical car and [REDACTED] should be the chauffeur. A report should be furnished on this.

25X1A

5. [REDACTED] On 2 September Bud Wheelon reported at the Executive Committee Meeting that there is a strike at the [REDACTED] facilities, apparently a wildcat strike, which tends to shut down a number of individual contracts and particularly our OSA contract. An injunction has been obtained from the court prohibiting the strike and apparently this will work out. The union officials support the injunction action as this is a wildcat group.

7. [REDACTED] In response to Mr. Helms' request I have prepared a draft paper on first refusal rights of [REDACTED] I submitted it to OGC for review and at the same time Mr. Houston returned from vacation. He wishes to revise the paper somewhat after which I will complete the paper and we will set up a meeting with Mr. Helms.

9. [REDACTED] (His Wife): In an indirect fashion and well after the fact, I was advised that [REDACTED] wife was taken to George Washington Hospital in what appeared to be a suicide attempt. I found out later that this was an outgrowth of an old problem. There was a failure in reporting this information which is pertinent for Front Office interest. I called this to the attention of Dr. Tietjen and the Office of Security and asked that this type of information be promptly reported so that everyone is aware of what is happening.

10. [REDACTED]  
University Hospital: Subject's relatives are unhappy over the way his case has been handled by the Agency, and they made a number of charges about our delay in providing medical care. Actually, this is not the case as [REDACTED] received excellent care in the course of his developing illness. Dr. Tietjen has the case in hand and has been in touch with the relatives. Hopefully we should not have any repercussions from this case.
